

Arlington Place

Arlington Place Gardens Memory Care is designed to provide our residents a secure environment while meeting the needs of daily living activities and services.

This is an all-inclusive program which provides dedicated staff trained to provide specialized, caring services to residents with Alzheimer's and/or Dementia diagnosis. All personal and health services needed are also included to provide quality of life, while maintaining resi-

dents' privacy and dignity.

The Life Enrichment Program is designed to engage residents in meaningful activities to prompt memories and special events in their each of their lives. Our goal is to create special moments during each interaction through planned and spontane-
